Gitit Regev

Full Stack Developer at Apester

Summary

In 3 words: eager to learn.

And in a few more words...

I'm a workaholic, full of passion to learn and develop in the web development field.

My head is swimming with ideas for apps to develop and i'm looking for a way to accomplish them all.

I think that for every problem there is a solution, you just need to know how to look for it in google. I also believe that today we can transform anything to work in automatic way (and this is why IOT is the next big thing).

Experience

Apester

Full Stack Developer

October 2019 - Present (6 months)

Tel Aviv Area, Israel
